SLCP BT Sistemi

Sosyal Uyum Programı (SLCP) Nedir?

SLCP, denetim yükünün azaltılması ve çalışma koşullarının iyileştirilmesini amaçlayan çok paydaşlı bir girişimdir.

VİZYON

Birleştirilmiş Değerlendirme.
İşbirlikçi Eylem.
İyileşen Çalışma Koşulları.

MİSYON

Paydaşlarının küresel tedarik zincirlerinde çalışma koşullarının iyileştirilmesine yönelik çabalarını destekleyecek, **birleşik değerlendirme çerçevesi** geliştirmek.

SLCP süreci ve platformlar

SLCP değerlendirme süreci online (çevrimiçi) olarak gerçekleşir.

Çevrimiçi süreci mümkün kılmak için SLCP, Gateway ve birden çok Akredite Hizmet Kuruluşu (AH) olan bir sistem yarattı.

Basitçe söylemek gerekirse:

- **Gateway**, tüm SLCP kullanıcılarını birbirine bağlar ve SLCP doğrulanmış verilerini güvenli bir şekilde depolar
- **Akredite Hizmet Kuruluşları**, veri toplama ve veri doğrulamayı kolaylaştırır. Ayrıca son kullanıcılar için SLCP tarafından doğrulanmış verileri de analiz edebilirler

Tesis olarak, Gateway’de ve AH’lerden en az birinde bir hesabınızın olması gerekir.

PVH Corp.

PVH is a fashion and lifestyle company that powers brands like, Calvin Klein, Tommy Hilfiger, Van Heusen, and IZOD, that drives fashion forward – for good

100% Increase positive impacts to 100%

SOURCE ETHICALLY

Expand the application of PVH's social and environmental standards to the manufacturing of all products and materials

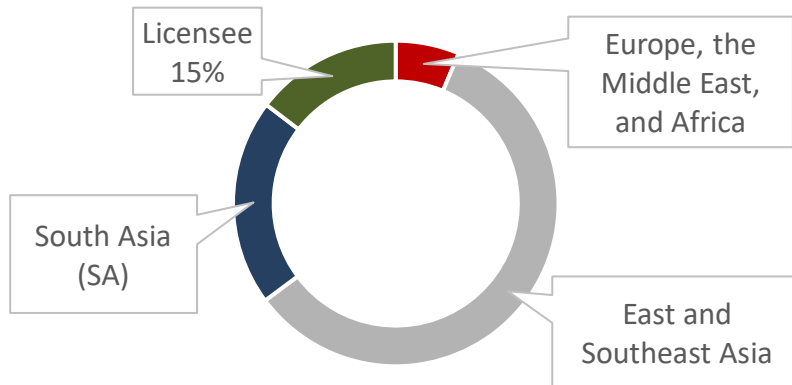

Key Target: 100% of PVH suppliers will meet or exceed all of our social and environmental standards by 2030

PVH's SLCP Adoption strategy –

THUS FAR AND LOOKING FORWARD

PVH is committed to adopting SLCP in lieu of the PVH Corporate Responsibility (CR) Assessment to scale positive impacts across our supply chain by leveraging industry tools. As SLCP is fully integrated into our existing operations, PVH will use SLCP to assess facilities' performance, supported by remediation and capability building services, including, where appropriate, training that promotes dialogue and cooperation between management and workers

In 2020, despite facing challenges with COVID-19 complications, PVH adopted the SLCP self-assessment and verification in lieu of the PVH CR Assessment in **250+ facilities**.

PVH's year-over-year adoption plan is aligned with our intention to adopt SLCP across all applicable suppliers by the end of 2022

On the right, there are links for "English", "About", and "Login". A black bar at the top of the content area says "Home". Below this, a red headline reads "Converged Assessment. Collaborative Action. Improved Working Conditions." The main text welcomes users to the SLCP Gateway, explaining its purpose in reducing audit fatigue by providing a single set of verified data. A "Menu" section lists various links: Quick Links, Information for Facilities, Information for Brands and Other Stakeholders, Information for Verifier Bodies and Verifiers, SLCP Countries/Regions, Information about Training Bodies and Training, Accredited Hosts, and Tools & Resources. Converged Assessment. Collaborative Action. Improved Working Conditions.

Welcome to the SLCP Gateway!

This is the starting point when embarking on the SLCP assessment process, whether you are a facility, Verifier (Body) or brand. Scroll down to find the information relevant for you.

The SLCP assessment process intends to combat audit fatigue. We achieve this by providing facilities with one set of factual verified data about the social and labor conditions in their facility. This data can be widely shared and used, thus reducing the need for repetitive and duplicative social audits. Facilities choose with whom to share their data. Buyers and standards can use the data set to reach their own conclusions. Resources saved through the elimination of additional social audits are redirected towards improving working conditions.

SLN TEKSTİL'in SLCP Yolculuğu

SLN TEKSTİL'den Öneriler

SLCP Doğrulanmış raporu birçok marka ve diğer paydaşlar ile paylaşımına imkanı sağlar.

Sürdürülebilir gelişmelere daha çok odaklanma sağlanır.

İlgili tüm birimler bir araya gelerek öz-değerlendirme tamamlanmalıdır.

Öz-değerlendirme ve doğrulama arasında en fazla 2 ay olabilir ve öz-değerlendirme son 12 ayı içermek zorundadır.

Öz-değerlendirmeyi online olarak tamamlamayı tercih edin.

Sorunuz var mı?

Doğru veya yanlış?

- ✓ SLCP sürecini başlatmak için Gateway'e kaydolmanız gerekir
- ✓ OAR ID'nizi ve marka ortaklarınızı Gateway profilinize ekleyebilirsiniz
- ✗ Gateway'de bir hesap talep edip şifre oluşturduktan sonra, Gateway profiliniz onaylanmıştır
- ✗ Profilinizde yalnızca tesis yönetimi tarafından konuşulan dili seçmelisiniz
- ✓ Gateway'de değerlendirmenizi doldurmak istediğiniz AH'ye bağlamanız gerekir
- ✓ Doğrulanmış değerlendirmenizi bir AH'den ve Gateway'den paylaşabilirsiniz

Overview of Program

What do we want to achieve? We believe that we can improve working conditions by joining forces: one single assessment for all, more resources and improvements for everyone. That is why we have created a Converged Assessment Framework that supports stakeholders' efforts to improve working conditions in global supply chains.

This program will help the industry to:

- Eliminate audit fatigue: avoid duplication and reduce the number of social & labor audits, by replacing current proprietary assessment tools
- Increase the opportunity for greater comparability of social & labor data
- Redeploy resources to improvement actions

www.slconvergence.org

The Converged Assessment Framework (CAF) consists of three elements: 1) Data Collection Tool (Excel and online on the AH platform)
2) Verification Protocol (PDF)
3) Guidance (PDF)

Data Collection Tool (Excel and online on the AH platform) The 'Questionnaire' used to gather data on social and labor conditions in a facility. Contains all the assessment questions that a facility must answer through a self/joint-assessment and that will be verified by an SLCP approved Verifier. Can be filled in online on an Accredited Host platform or offline through an Excel file downloadable from an

Doğru veya Yanlış?

- ✓ Higg, üreticilere tesislerinin performansını puanlama olanağı sağlar
- ✓ FFC, bir tesisin doğrulanmış veri setini bir şirketin Davranış Kuralları ile karşılaştırabilir ve uygunluğu belirleyebilir
