

The background of the slide is a close-up photograph of several spools of thread. In the foreground, a spool of orange thread is prominent on the left. Behind it and to the right are several spools of white thread. The threads are slightly out of focus, creating a sense of depth. The lighting is soft, highlighting the texture of the threads and the metallic sheen of the spools.

# What can you tell you about you?

## Tell us

- 1) Which country are you dialing in from?
- 2) Which type of organization do you work for?
- 3) Have you already completed an SLCP assessment (including verification)?
- 4) Have you already been able to reduce the number of social compliance audits in your facility thanks to SLCP?
- 5) Which superpower would you like to have?

# Introducing Sharing

# SLCP assessment process

## Three stages of the SLCP assessment process:

- ✓ **Facility** fills in the Data Collection Tool, either alone (self-assessment) or with help (joint-assessment)

Stage 1:  
Data Collection

1

- ✓ **Facility** selects a **Verifier Body** who assigns a **Verifier** to do the verification of the collected data

Stage 2:  
Verification

2

- ✓ **Facility** reviews the verified data and can then share the verified assessment report with selected **business partners**

Stage 3:  
Data Sharing

3

# Sharing is how we achieve our goal

SLCP is a multi-stakeholder initiative to reduce audit fatigue and improve working conditions.

50+

Brands & retailers publicly committed to accepting SLCP verified data

10 million USD

Potentially unlocked by 4,000 verified assessments in 2021

Thousands of USD

Saved by individual facilities in 2021 on unnecessary audits

# Brands & Standard Holders that accept SLCP Data

For more details, including which countries and tiers brands & standard holders accept SLCP data from, please see the full list on our [website](#).

# Achievements for facilitites

## BBI 2021 Ratings Cycle:

Over **20%** of respondents reported their buyers are accepting SLCP.

Many reported saving thousands (up to **\$20,000**) as a result.

Savings reinvested in workplace improvements, new technologies, improved social protections for workers & community programs.

*As reported by SLCP signatory manufacturers:*

### Manufacturer 1:

Saved **12 unnecessary audits** in 2021.

Reduced audits saved a total of **32 days** worth of working hours.

### Manufacturer 2:

Was able to share SLCP verified data with customers that make up **80% of production volume**.

# How to Share a Verified Assessment with Brands on the FFC Platform

SLCP Facility Training on FFC Accredited Host Platform CAF 1.4

# Share a Verified Assessment from the FFC Platform

**There are 2 types of shared assessments in FFC:**

1. Assessments that have been completed on the FFC platform
2. Assessments that have been completed on another Accredited Host platform and shared with FFC

## 1. Assessments that have been completed on the FFC platform

- Completed verified assessments can be found on the *Verified SLCP Assessment(s) tab*.
- By default, no brands are given access to facility assessments – facilities must grant brands access.
- Brands in the FFC know that they must have a Status of “pending’ or ‘active’ on your facility profile else you cannot share your assessment with them. Brands also have a button where they can send facilities and email and request access to the assessment.
- Assessments that are Deleted or Invalidated cannot be shared
- There is no fee to share an assessment that was completed on the FFC platform with brands on FFC

**To grant your brand access to an assessment completed on the FFC Platform:**

Click the *Verified SLCP Assessment* tab

Click the **Wrench** icon to see a list of FFC Brands that are SLCP Signatories and are linked to your factory in the FFC.

## 2. Sharing assessments with FFC that have been completed on another Accredited Host platform

FFC has been an Accredited Host since SLCP's inception. SLCP charges FFC a fee for assessments that are shared with FFC from another accredited host. Since inception, FFC has allowed facilities to share SLCP assessments from other Accredited Hosts at no cost .

Starting 17th Feb 2022, FFC will pass on the cost that SLCP charges FFC to the facility.

You only must pay the fee once and then you can share the assessment with as many FFC brands as you wish. The fee is \$60 USD – the only forms of payment accepted are credit card and Paypal.

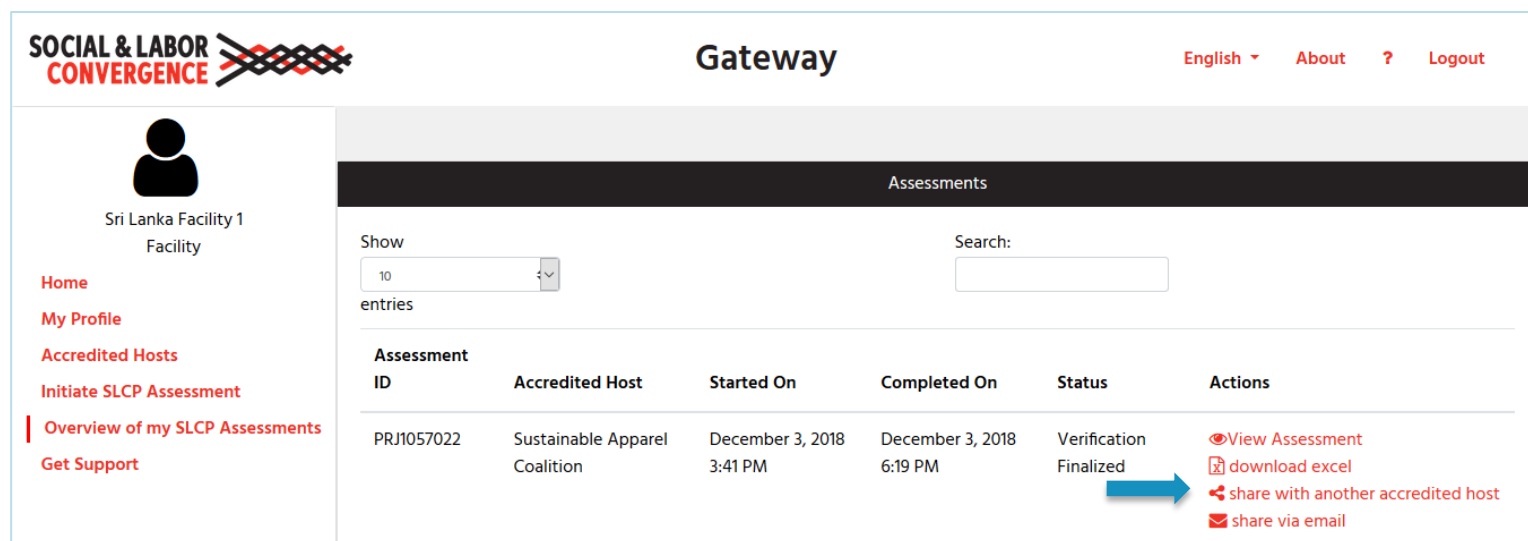

## Assessments that have been completed on another Accredited Host platform and shared with FFC

Facilities must be registered as an SLCP facility on FFC before they can share their assessment. If you have not registered in FFC yet, please refer to the beginning of this document for help with registration.

Sharing is done from the **Gateway** – facility will log into the Gateway and select *Overview of my SLCP Assessments* from the menu.

Click the *share with another accredited host option* from the **Actions** column.

A list of all AH's that the facility has registered with will display – choose FFC.

If you are not redirected to the payment page, this means you have already paid the sharing fee or you have completed your assessment on FFC and do not need to pay a fee

Select the form of payment and click the **Continue** button.

Fill out the credit card information or the PayPal information (depending on your selection)

The screenshot shows a web interface titled "SLCP Share Assessment" with a close button in the top right corner. Below the title is the FFC logo (Fair Factories Clearinghouse). The payment selection area contains five radio button options, each with a corresponding logo: Visa, MasterCard, American Express, Discover, and PayPal. At the bottom of the form are two blue buttons: "Back" on the left and "Continue" on the right.

# How does FFC help NewBalance use the data?

- **Translation to brand Principles or Code of Conduct (CoC):**
  - Mapping of SLCP verified data to brand's Code of Conduct
  - Identified violations are presented as Findings.
  - Brand scoring systems can be applied to the Findings automatically.
  - Brands use the Findings to build Corrective Action Plans for follow-up.
  - Deeper analysis utilizing SLCP broader information (factory profile) and findings.
  
- **Benchmarking: showing non compliances to industry standards**

**SOCIAL & LABOR  
CONVERGENCE**

**Did we explain  
ourselves well?**

# True or False?

1. Data sharing is the 3<sup>rd</sup> and final stage of the SLCP assessment process 
2. It is up to the facility to decide who they want to share their verified data with 
3. Facilities can share their verified data with end-users directly from the SLCP Gateway 
4. Facilities can only share their verified data through the Accredited Host they completed their assessment on 
5. Some brands have a direct connection with the Gateway

# Passive and Brand Hosts

# More ways to share..

## SLCP Gateway

Central repository for all verified SLCP assessments, built by ITC. Facility controls data sharing here.

## Brand Hosts

Brand platforms that RECEIVE SLCP verified data directly from the Gateway.

Current Brand Hosts:

**INDITEX**

## Passive Accredited Hosts

Platforms that only RECEIVE and distribute SLCP verified data to end-users with additional services.

Facilities can select the platform(s) they want to share their SLCP verified data with via their Gateway account.

# Manufacturers' Use of Verified Data

*"The SLCP verified data is one of the internal options and reference for monitoring the factory performance. We also compared the verified assessments with self-assessments to identify the gap for the further improvements"*

*"We are using the verified assessment data as baseline to set target for future factory performance improvement and to monitor the progress in the future"*

*"We utilize the data to manage and evaluate facility's social performance".*

*"SLCP verified assessments are used as a tool for benchmarking and it is currently being used across our brands".*

*"Focus on improvement areas, training & awareness"*

# Taypa's experience with SLCP and sharing

## Why we choose SLCP:

-  Helps identify issues and plan systematic and sustainable improvements
-  Supports in establishing management system infrastructure
-  Involves verifying a year's worth of data reviewed during the self-assessment, instead of only taking a snapshot of the factory

We were able to share our SLCP verified data with brands that make up **65% of our production volume**

SLCP saved us **12 unnecessary audits** in 2021

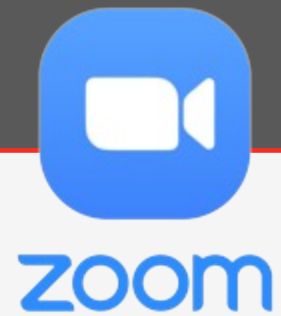

Due to the reduction in audits at 4 facilities, we **saved a total of 32 days** worth of working hours

**Did we explain  
ourselves well?**

# True or False?

1. Sharing SLCP verified data can save facilities from completing unnecessary audits
2. There are three Active Accredited Hosts: FFC, Higg and the Gateway
3. Accredited Hosts can provide data analysis services to brands and manufacturers
4. It is free to share SLCP verified data from the Gateway
5. The SLCP IT system may include more Accredited Hosts in the future
